Catlinite Pipes

Genuine Catlinite is a deep red color and found only in a deposit in Minnesota, an area that is under control of the U.S. National Park Service, called Pipestone National Monument. Only Native Americans are allowed to obtain Catlinite from this area, which is named after the famous artist, George Catlin. He was the first white man known to have visited the quarry in the mid-1800s. Our Catlinite pipes are expertly hand-crafted from genuine Minnesota pipestone by a fifth generation Oglala Sioux pipemaker. Each pipe is polished to a soft luster and treated with beeswax for protection.
